

PROJECT REPORT
ON
CABLE SERVICE SUBSCRIPTION WEBSITE

(FOR THE COURSE OF T. Y. B.SC.
COMPUTER SCIENCE)

DESIGNED AND DEVELOPED
BY
Mr. VIHANG RAJENDRA PIMPALE

GUIDED BY
Ms. PRATIKSHA HARWARKAR
DEPARTMENT OF COMPUTER SCIENCE

PARLE TILAK VIDYALAYA ASSOCIATION'S
MULUND COLLEGE OF COMMERCE (AUTONOMOUS)
(AFFILIATED TO UNIVERSITY OF MUMBAI)
2024-2025

MULUND (WEST), MUMBAI-400080
MAHARASHTRA, INDIA

ACKNOWLEDGEMENT

I have a great pleasure in representing this project report entitled “Cable Service Website” and I grab this opportunity to convey my immense regards towards all the distinguished people who have their valuable contribution in the hour of need.

I like to extend my gratitude to our beloved Principal Dr. Sonali Pednekar for her timely and prestigious guidance.

I take this opportunity to thank Dr. Reena Nagda, Coordinator of the Department and all the faculty members of the Department of Computer Science of Mulund College of Commerce, for giving me an opportunity to complete this project and the most needed guidance throughout the duration of the programme.

I am extremely grateful to my project guide Ms. Pratiksha Harwalkar for her valuable guidance and necessary support during each phase of the project. She was the source of continuous encouragement as each milestone was crossed.

Finally, I also owe to my fellow friends who have been a constant source of help to solve the problems that cropped up during the project development process.

VIHANG RAJENDRA PIMPALE

1.Title

1.1 Title of Project
SOLAIRE

1.2 Type of Project
SUBSCRIPTION-BASED WEBSITE

1.3 Developed by
VIHANG PIMPALE

2. Introduction

2.1 Objective of Project

1. **Subscription Management:** Develop a user-friendly platform that allows users to easily subscribe to cable TV packages and individual channels, with secure payment integration for seamless transactions.
2. **Customizable Viewing Options:** Enable users to browse a wide range of cable TV packages and channels, offering personalized recommendations based on user preferences and viewing history.
3. **Account and Subscription Management:** Provide a user dashboard where subscribers can manage their account details, view current subscriptions, and upgrade or modify their cable services as needed.
4. **Admin Functionality:** Create an admin panel that allows administrators to add, edit, and delete channels and packages, as well as manage user subscriptions and generate reports for business insights.
5. **Scalable and Secure System:** Implement a scalable and secure website architecture, ensuring data protection, user privacy, and the ability to handle a growing number of subscribers and package offerings efficiently.

2.2 Description of the Current System

- **Overview of Features and Services with Visuals:**

- Comprehensive descriptions and high-quality images of available channels and packages.

- **Subscription Plans, Pricing, and Online Sign-Up:**

- Clear pricing details for individual channels and bundles, with an easy online sign-up process.

- **Real-Time Program Guide:**

- Up-to-date listings of current and upcoming shows across all subscribed channels.

- **User Account Management Tools:**

- Manage subscriptions, view payment history, and track service renewals.

- **Customization and Add-Ons:**

- Options to customize subscriptions by adding or removing channels and upgrading packages.

2.3 Limitations of the Current System

- **Limited Coverage Area:**
 - The service may only be available in specific geographic regions, restricting access for users outside these areas.
- **Channel Availability Variations:**
 - Some channels or packages might not be available in all regions, leading to inconsistent service offerings.
- **Technical Issues and Downtime:**
 - Users might experience technical problems or downtime affecting the availability of the service or its features.
- **Complex Subscription Management:**
 - Users could face difficulties in managing their subscriptions or understanding the pricing structure, especially if it involves multiple add-ons and packages.
- **Data Privacy Concerns:**
 - Handling sensitive user information, including payment details, could pose privacy risks if not managed with stringent security measures.

2.4 Description of the Proposed System

1. **Comprehensive Cable Packages:**
 - Offers a variety of cable TV packages and channels, catering to different preferences and budgets.
2. **User-Friendly Subscription Management:**
 - Allows users to easily subscribe to, view, and manage their cable TV packages and individual channels through an intuitive interface.
3. **Admin Dashboard for Package and Channel Management:**
 - Provides administrators with tools to add, edit, and delete cable packages and channels, ensuring up-to-date offerings.
4. **Secure Payment System:**
 - Features a secure payment gateway for processing transactions related to new subscriptions and package upgrades.
5. **Enhanced User Experience:**
 - Includes functionalities like account management, subscription history, and support for newly added channels and packages to enhance overall user satisfaction.

2.5 Advantages of the Proposed System

- Streamlined **Subscription Management**:
 - Users can easily browse, subscribe to, and manage cable packages and channels, providing a seamless and user-friendly experience.
- Flexible **and Up-to-Date Offerings**:
 - The system allows for real-time updates and additions of new channels and packages, ensuring users always have access to the latest content.
- Efficient **Admin Controls**:
 - Admins have robust tools for managing packages and channels, including the ability to add, edit, and delete offerings, which simplifies content management.

3. Requirement Specification

3.1 Software Requirements

- Operating System: Microsoft Windows 10.
- Application Software:
 - Front End: HTML, CSS.
 - Back End: PHP, MySQL, JavaScript.
- Platform: VS Code.

3.2 Hardware Requirements

- Processor: 1.6 Ghz.
- Ram: Minimum 4GB.
- Disk Space: 1GB or less

3.3 Data Requirements

- Username
- age
- Email
- Password

3.4 Fact Finding Questions

- What channels or packages are most frequently subscribed to by users?
- What additional features or channels do users wish were available?
- What are the most common issues users face with the subscription or payment process?
- How do users prefer to manage their subscriptions (e.g., via website, mobile app)?
- What payment methods do users prefer for their subscriptions?
- What are the common reasons users cancel or modify their subscriptions?

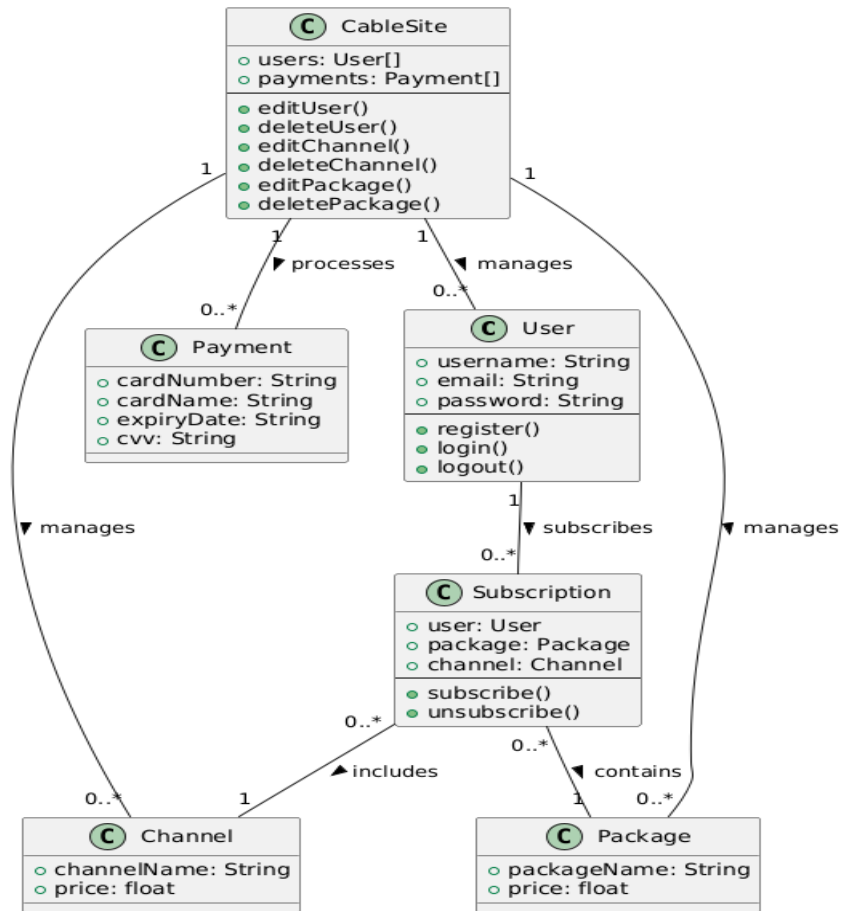

4.System Design:

4.1 Event Table:

Sr.No	Events	Trigger	Source	Activity	Response	Destination
1	User Registration	register-btn	User	Filling Form Details	If successfull redirect to login interface or else error	logreg.php
2	User Login	login-btn	User	Entering registered username/ email And password	If username/Email and Password are correct then logged in or else error	Login.php
3	User Panel	dashboar-d-btn	User	To manage the user data	Displays the data by user and able to manage it	homes.php
4	home	home-btn	User	To view the tours of different categories	Displaying the offerings of our cable site	homes.php
5	About	about-btn	User	To view about the page	Displays the about page	about.page
6	channel	channel-btn	User	To view the channels	Displays the channels	channels.php

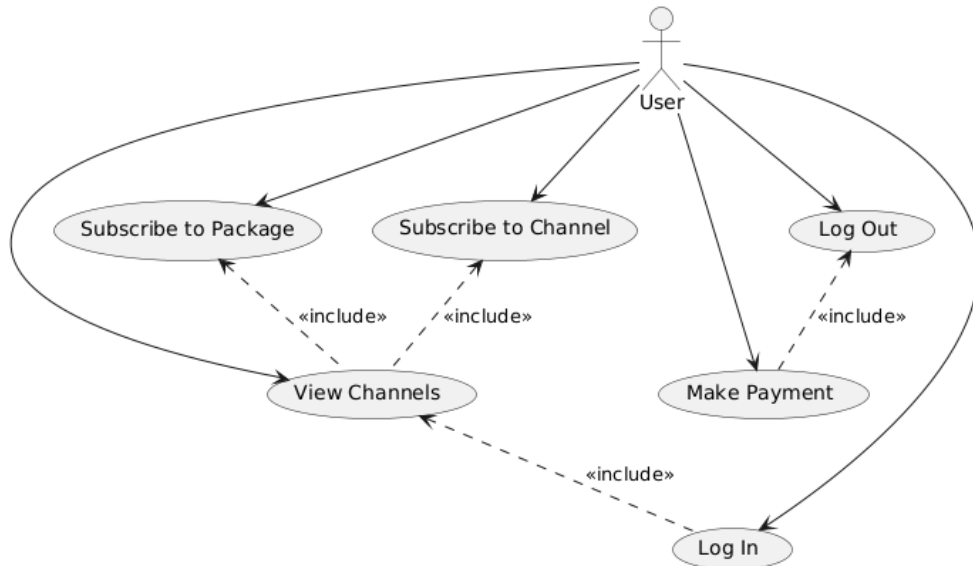

7	package	package -btn	User	To view the packages	Displays the packages	packages. php
8	Admin Login	signin- btn	Admin	Entering the admin username/ email and password	If username/ Email and Password are correct then logged in or else error	logreg.php
9	Admin Panel	dashboa rd-btn	Admin	To edit delete and update the user	Displays all the user and categories and manage them all	Home.php
10	Payment _channe l	payment -btn	User	To input card details from the user	Redirects to page

4.10.2 channels:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	channel_id	int(11)			No	None		AUTO_INCREMENT	 Change  Drop  More
2	channel_name	varchar(100)	utf8mb4_general_ci		No	None			 Change  Drop  More
3	price	decimal(10,2)			No	0.00			 Change  Drop  More

Channels Table:

The channels table stores information about individual channels, including their names and prices. It serves as the catalog of available channels for subscription, with each channel having a unique identifier.

Purpose:

Maintains the list of channels that users can browse and subscribe to.

Stores pricing information for each channel, which may be used for billing and subscription purposes.

connected with other tables (like user_channels which track which users are subscribed to specific channel)

4.10.3 packages:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
<input type="checkbox"/> 1	package_id	int(11)			No	None		AUTO_INCREMENT	 Change  Drop  More
<input type="checkbox"/> 2	package_name	varchar(100)	utf8mb4_general_ci		No	None			 Change  Drop  More
<input type="checkbox"/> 3	description	text	utf8mb4_general_ci		Yes	NULL			 Change  Drop  More
<input type="checkbox"/> 4	price	decimal(10,2)			No	None			 Change  Drop  More

Packages Table:

The packages table stores information about different subscription packages, including package names, descriptions, and prices. It is used to group channels into different bundles that users can subscribe to.

Purpose:

Maintains the list of packages that users can browse and subscribe to.

Stores pricing information for each Package, which may be used for billing and subscription purposes.

connected with other tables (like user_subscriptions which track which users are subscribed to specific channel)

4.10.4 user_channels:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
<input type="checkbox"/>	1 user_channel_id	 int(11)			No	None		AUTO_INCREMENT	 Change  Drop  More
<input type="checkbox"/>	2 user_id	 int(11)			Yes	NULL			 Change  Drop  More
<input type="checkbox"/>	3 channel_id	 int(11)			Yes	NULL			 Change  Drop  More
<input type="checkbox"/>	4 subscribed_at	timestamp			No	current_timestamp()			 Change  Drop  More

User Channels Table

The user_channels table manages the relationship between users and their subscribed channels. It links users to channels they have subscribed to, recording when the subscription began.

Purpose:

Tracks which channels each user is subscribed to.

Helps in managing subscriptions, allowing the system to associate users with their preferred channels.

used for displaying subscribed channels in the user profile and for billing or usage tracking purposes.

4.10.5 user_subscriptions:

 Table structure
  Relation view

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
<input type="checkbox"/> 1	subscription_id	 int(11)			No	None		AUTO_INCREMENT	 Change  Drop  More
<input type="checkbox"/> 2	user_id	 int(11)			Yes	NULL			 Change  Drop  More
<input type="checkbox"/> 3	package_id	 int(11)			Yes	NULL			 Change  Drop  More
<input type="checkbox"/> 4	subscribed_at	timestamp			No	current_timestamp()			 Change  Drop  More

User Subscriptions Table

The user_subscriptions table tracks the relationship between users and the packages they are subscribed to. It records when a user subscribed to a specific package, facilitating subscription management.

Purpose:

Tracks which Packages each user is subscribed to.

Helps in managing subscriptions, allowing the system to associate users with their preferred Packages.

used for displaying subscribed Packages in the user profile and for billing or usage tracking purposes.

4.10.6 new_channels:

 Table structure
  Relation view

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
<input type="checkbox"/> 1	id 	int(11)			No	None		AUTO_INCREMENT	 Change  Drop  More
<input type="checkbox"/> 2	channel_name	varchar(255)	utf8mb4_general_ci		No	None			 Change  Drop  More
<input type="checkbox"/> 3	description	text	utf8mb4_general_ci		Yes	NULL			 Change  Drop  More
<input type="checkbox"/> 4	image	blob			Yes	NULL			 Change  Drop  More
<input type="checkbox"/> 5	price	decimal(10,2)			No	None			 Change  Drop  More

New Channels Table

The new_channels table holds details about newly added channels, including descriptions and images, along with pricing. It's primarily used to showcase recent additions to the channel lineup.

Purpose:

Used to store detailed information about newly added channels that might be showcased to users.

Works alongside the channels table to highlight new or recently launched channels that users can subscribe to.

4.10.7 new_packages:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
<input type="checkbox"/> 1	id 	int(11)			No	None		AUTO_INCREMENT	 Change  Drop 
<input type="checkbox"/> 2	package_name	varchar(255)	utf8mb4_general_ci		No	None			 Change  Drop 
<input type="checkbox"/> 3	description	text	utf8mb4_general_ci		Yes	NULL			 Change  Drop 
<input type="checkbox"/> 4	price	decimal(10,2)			No	None			 Change  Drop

<input type="checkbox"/> 6	image	blob			Yes	NULL			 Change  Drop 

 ☐ Check all With selected:  Browse  Change  Drop  Primary  Unique  Index  Spatial  Fulltext

New Packages Table

The `new_packages` table stores information about newly added subscription packages, including package names, descriptions, images, and prices. It is used to highlight and manage recently introduced package

Purpose:

Used to store detailed information about newly added Packages that might be showcased to users.

Works alongside the `packages` table to highlight new or recently launched channels that users can subscribe to.

4.10.8 new_userchannels:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
<input type="checkbox"/> 1	id 	int(11)			No	None		AUTO_INCREMENT	 Change  Drop  More
<input type="checkbox"/> 2	user_id	int(11)			No	None			 Change  Drop  More
<input type="checkbox"/> 3	channel_id 	int(11)			No	None			 Change  Drop  More

New User Channels Table

The new_userchannels table tracks which users have subscribed to newly added channels. It functions similarly to the user_channels table but focuses on recent or promotional channel offerings.

Purpose:

Tracks the relationship between users and newly added channels.

Similar to the user_channels table, it manages user subscriptions, but likely focuses on newly added or recently promoted channels.

Used for displaying which new channels users are subscribed to

4.10.9 new_usersubscriptions:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	subscription_id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
2	user_id	int(11)			No	None			Change Drop More
3	package_id	int(11)			No	None			Change Drop More
4	subscribed_at	timestamp			No	current_timestamp()			Change Drop More

New User Subscriptions Table

The new_usersubscriptions table manages user subscriptions to new packages. It records when users subscribe to new or promotional packages, helping to track the uptake of recent offerings.

Purpose:

Manages user subscriptions to newly introduced packages.

Similar to the user_subscriptions table, but focusing on new or promotional subscription packages.

Helps track user subscriptions to new or updated packages.

Summary:

- channels
 - `channel_id`: Primary Key, integer.
 - `channel_name`: Unique, varchar.
 - `price`: Decimal (e.g., 0.00).
- new_channels
 - `added_date`: Datetime, nullable, with the current timestamp as the default.
 - `channel_name`: Varchar.
 - `description`: Text, nullable.
 - `id`: Primary Key, integer.
 - `image`: Blob, nullable.
 - `price`: Decimal.
- new_packages
 - `added_date`: Datetime, nullable, with the current timestamp as the default.
 - `description`: Text, nullable.
 - `id`: Primary Key, integer.
 - `image`: Blob, nullable.
 - `package_name`: Varchar.
 - `price`: Decimal.
- new_userchannels
 - `channel_id`: Foreign Key, integer (links to channels).
 - `id`: Primary Key, integer.
 - `user_id`: Integer.
- new_usersubscriptions
 - `package_id`: Foreign Key, integer (links to packages).
 - `subscribed_at`: Timestamp, with the current timestamp as the default.
 - `subscription_id`: Primary Key, integer.
 - `user_id`: Foreign Key, integer (links to users)
- packages

- `description`: Text, nullable.
- `package_id`: Primary Key, integer.
- `package_name`: Unique, varchar.
- `price`: Decimal.
- users
 - `created_at`: Timestamp, with the current timestamp as the default.
 - `email`: Unique, varchar.
 - `password`: Varchar.
 - `username`: Unique, varchar.
 - `user_id`: Primary Key, integer.
 -
- user_channels
 - `channel_id`: Foreign Key, integer, nullable.
 - `subscribed_at`: Timestamp, with the current timestamp as the default.
 - `user_channel_id`: Primary Key, integer.
 - `user_id`: Foreign Key, integer, nullable.
- user_subscriptions
 - `package_id`: Foreign Key, integer, nullable.
 - `subscribed_at`: Timestamp, with the current timestamp as the default.
 - `subscription_id`: Primary Key, integer.
 - `user_id`: Foreign Key, integer, nullable.

5. System Implementation:

6.Results

6.1 Validation and Naming Conventions:

Sr. No	Control Id	Validation Used	Reason
1	username	Required Attribute	username of the User/Admin Cannot be Empty.
2	email	Required Attribute	Email Cannot be Empty.
3	password	Required Attribute	Password Cannot be Empty.
4	confirmpassword	Required Attribute	Confirm Password Cannot be Empty.
5	Card_number	Required Attribute	Ensures that the card number field cannot be left empty.
6	Card_name	Required Attribute	Ensures that the cardholder's name field is filled out.
7	Expiry_date	Required Attribute	Ensures that the expiry date field is not left blank.
8	cvv	Required Attribute	Ensures that the CVV field is completed.

6.2 screenshots:

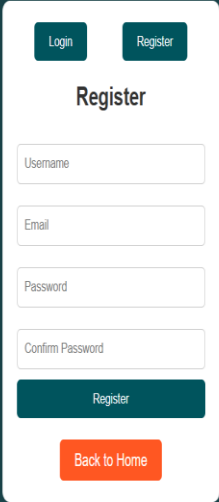

6.2.1 package details page:

Package Details Page:

The Package Details Page offers users a comprehensive overview of available virtual tours or featured content. Users can browse different tours, each showcasing unique multimedia presentations or interactive experiences. Each tour is displayed with key details such as the name, description. The page is designed, with thumbnails and brief descriptions of the Base packages in the cable service. Upon selection, the user is taken to a detailed view PDF with additional information of the channels.

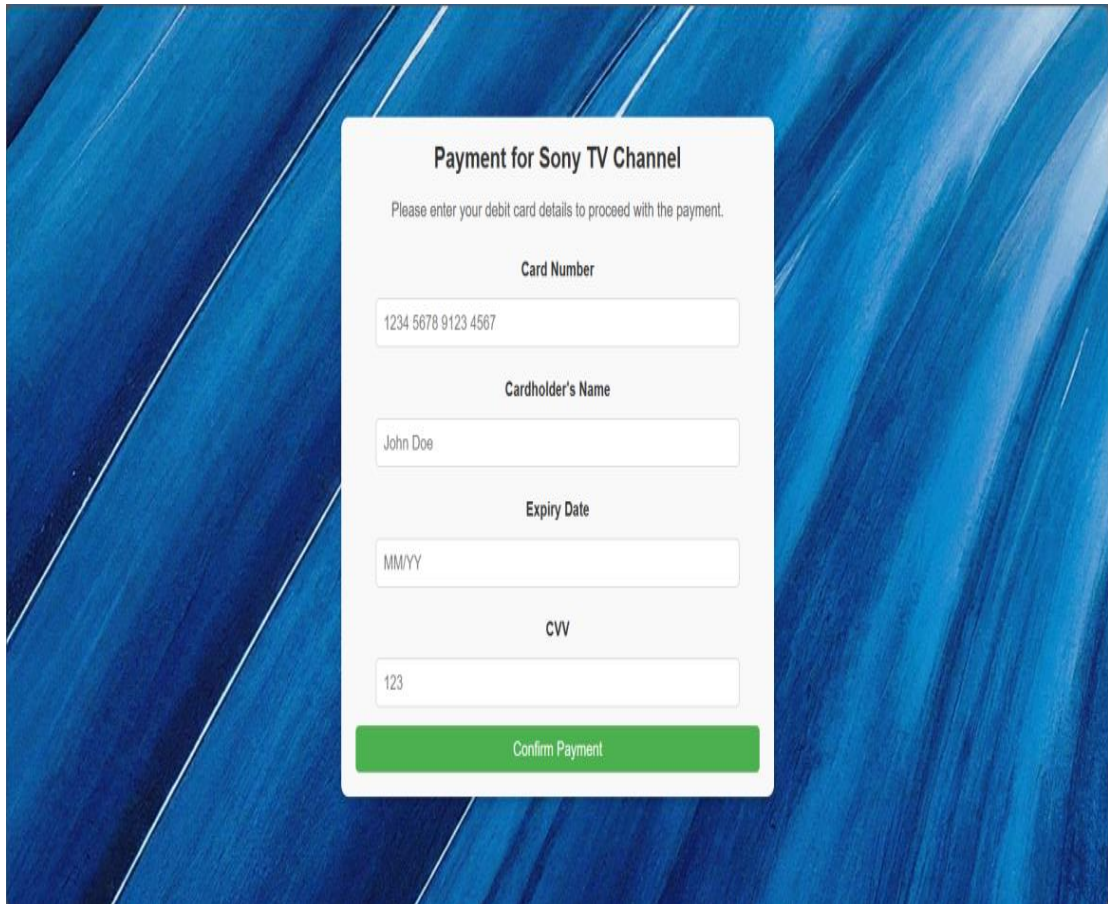

6.2.2 Register page:

The image shows a registration form centered on a dark teal background. The form is a white rounded rectangle. At the top, it has two buttons: 'Login' and 'Register'. Below these is the title 'Register'. The form contains four input fields: 'Username', 'Email', 'Password', and 'Confirm Password'. At the bottom of the form is a large 'Register' button, and below that is a smaller 'Back to Home' button.

Register Page:

The Register Page allows new users to create an account on the platform. Users provide essential details such as their name, email, and password. There are validation checks to ensure strong passwords and unique email addresses. The page is designed with a simple and user-friendly form layout, making registration easy and fast. Once registered, users can immediately access free content or subscribe to premium packages. Visual indicators help guide users if they make errors during the registration process.

6.2.3 Payment page:

A screenshot of a payment form titled "Payment for Sony TV Channel". The form is centered on a blue background with diagonal lines. It contains the following fields: "Card Number" with the value "1234 5678 9123 4567", "Cardholder's Name" with the value "John Doe", "Expiry Date" with the placeholder "MM/YY", and "CVV" with the value "123". A green "Confirm Payment" button is at the bottom.

Payment for Sony TV Channel

Please enter your debit card details to proceed with the payment.

Card Number

1234 5678 9123 4567

Cardholder's Name

John Doe

Expiry Date

MM/YY

CVV

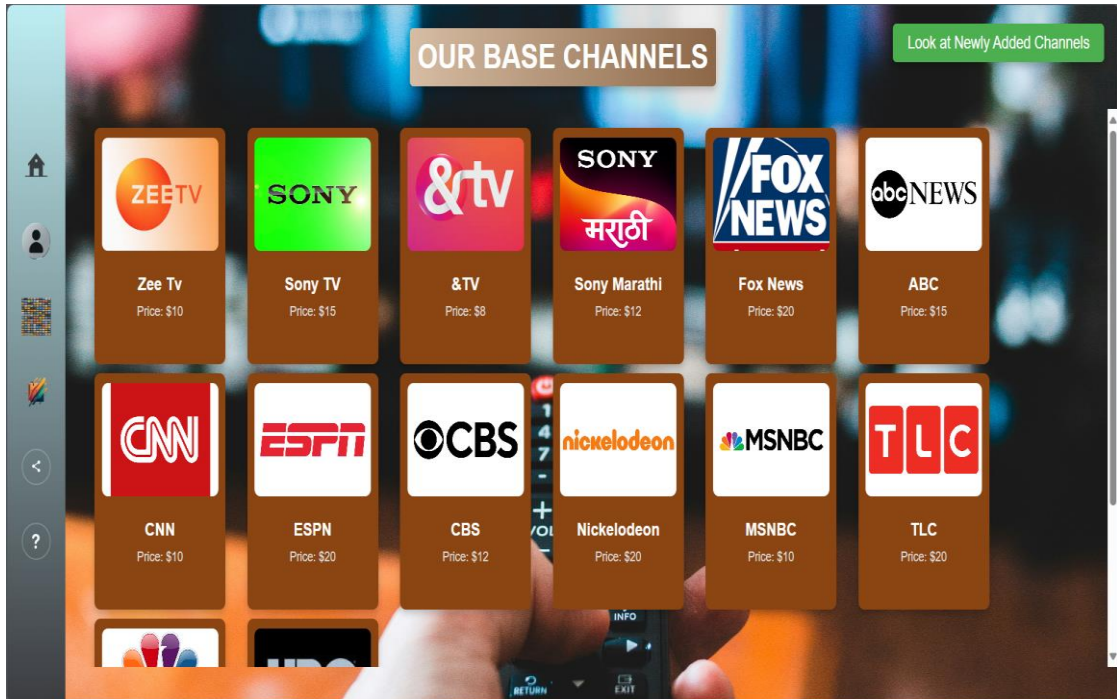

123

Confirm Payment

Payment Page:

The Payment Page is where users finalize their subscription or purchase of a channel or package. Users enter credit card details such as card number, expiration date, and CVV to complete the transaction. The form includes validation to ensure correct input of payment information. Pricing details for the selected package or channel are clearly displayed. After confirming payment, users receive a notification and access to their chosen services. The page is secured to protect sensitive payment data.

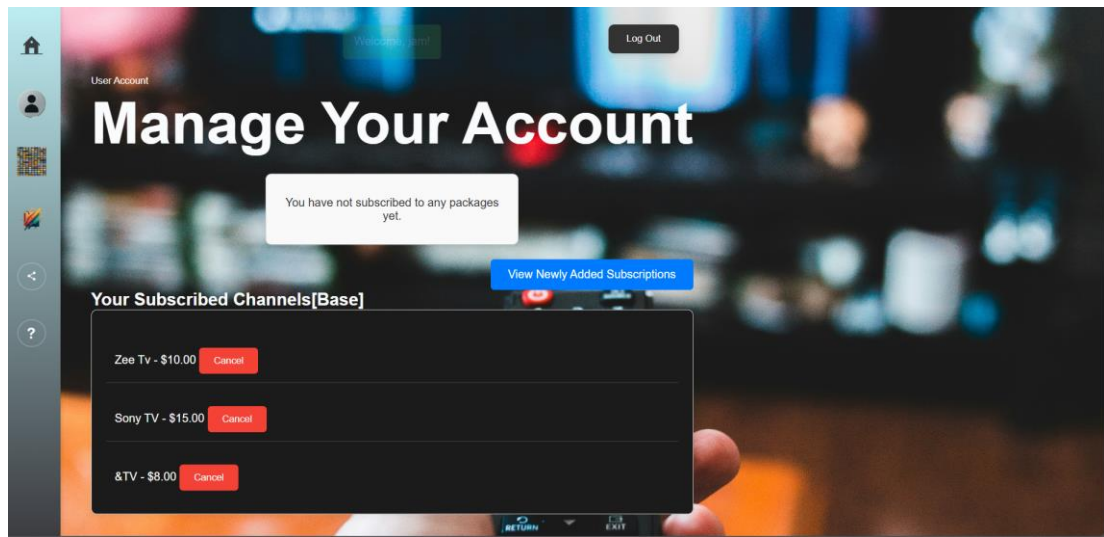

6.2.4 Channels Page:

Channels Page:

The Channels Page displays a list of available TV or online streaming channels that users can subscribe to. Users can browse, view, and select channels based on their interests or preferences. Each channel card provides details such as the channel name, pricing, and description. A user can also click on individual channels to view more information or subscribe directly. The page integrates filtering or sorting options to enhance user experience. It's designed to be user-friendly, with a clean layout for easy navigation.

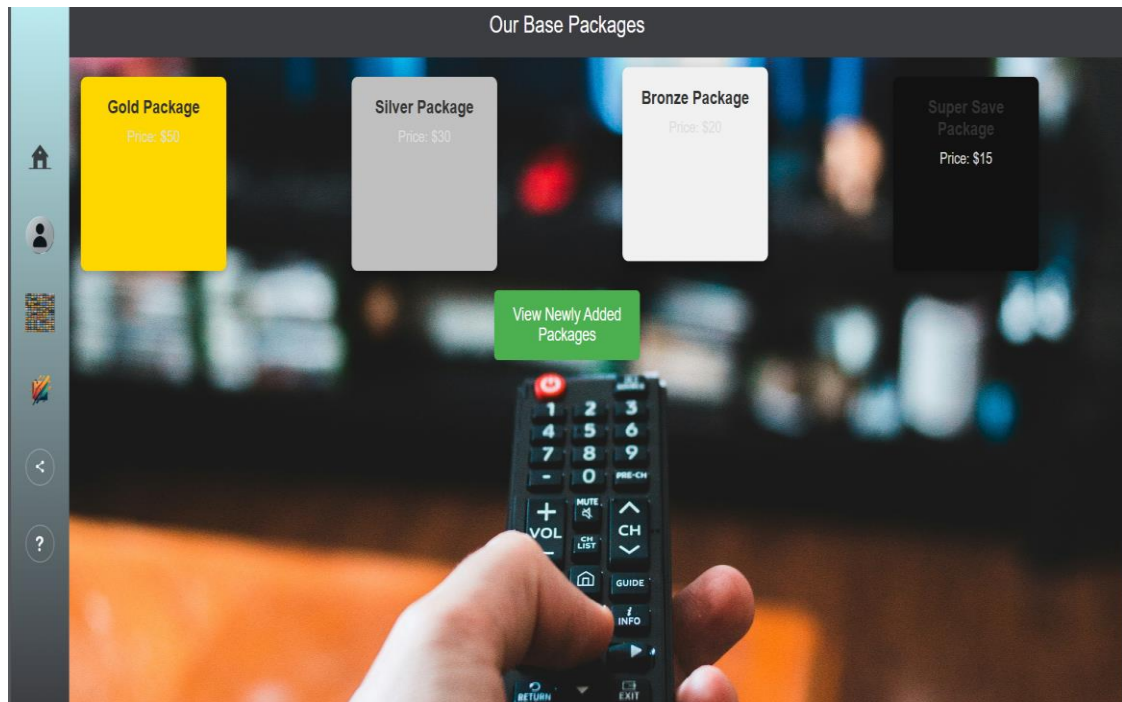

6.2.5 User Account Page:

User Account Page:

The User Account Page is where users can manage their personal information and account settings. It includes features such as updating profile details, changing passwords, and viewing subscription history. Users can also see their payment information and manage their subscribed packages or channels. Additionally, the page offers a user dashboard to track their usage or modify notification settings. It's secure and designed to prioritize user privacy and data management.

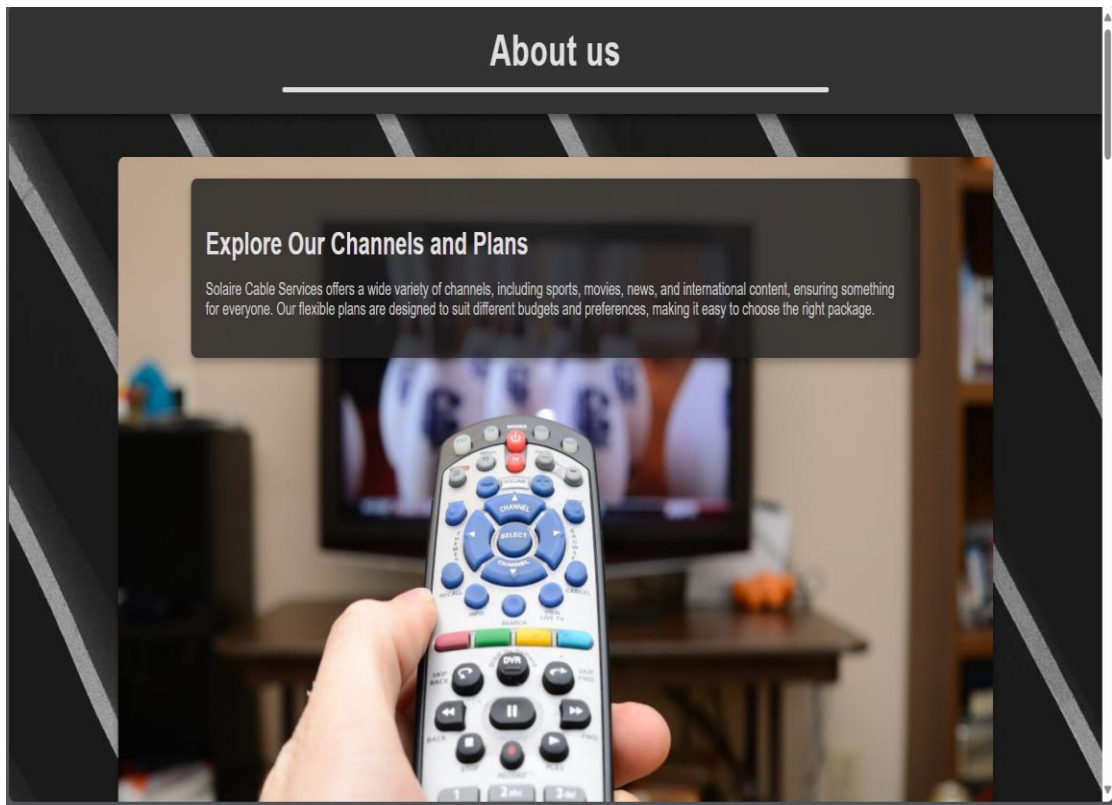

6.2.6 Packages Page:

Packages Page:

This page displays the available subscription packages users can choose from. Each package includes a collection of channels or services bundled together for a single price. The page provides a comparison of different packages, showing the included channels, price, and special offers. Users can click on individual packages for more details or proceed with the subscription process. It also integrates payment and account management for ease of use. The layout ensures clarity and user interaction flow.

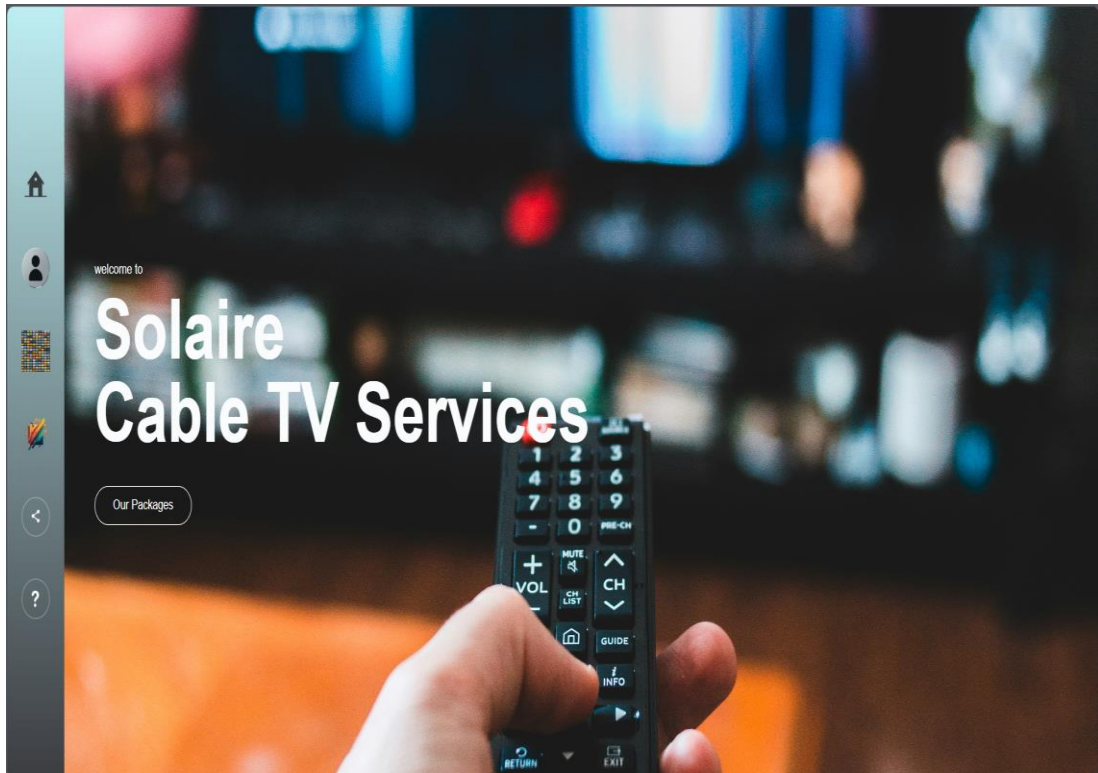

6.2.7 About us page:

About Us Page:

The About Us Page provides information about the company, its mission, and its services. It highlights the organization's history, values, and the goals it seeks to achieve. A professional and welcoming design invites users to engage.

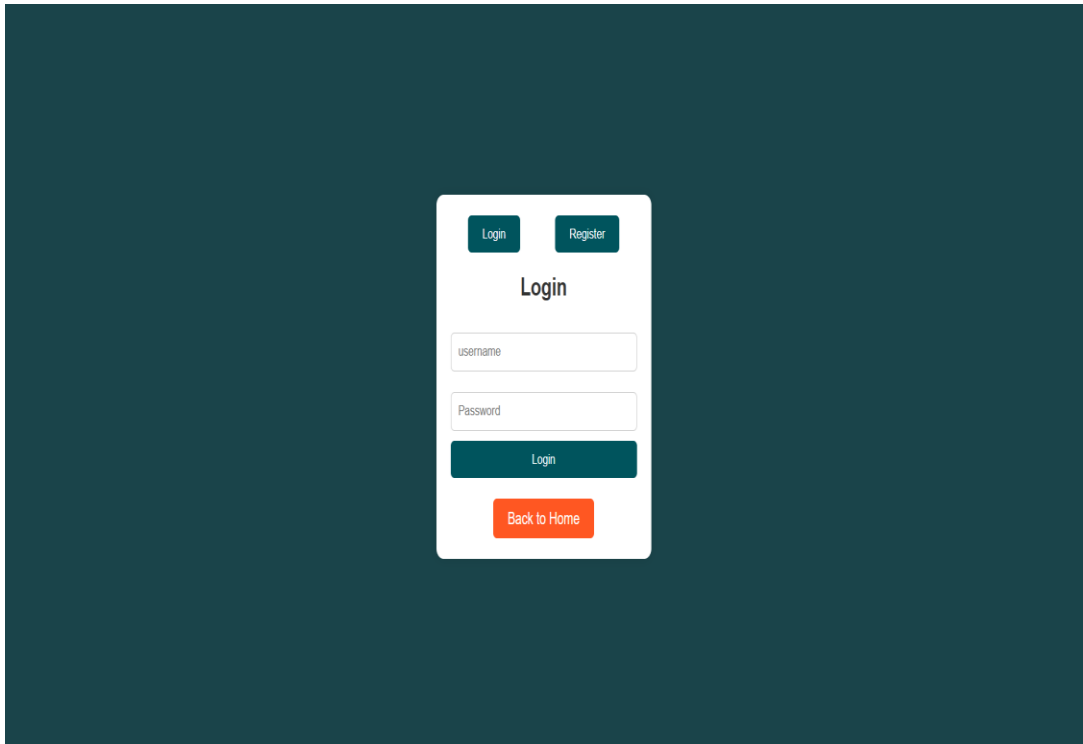

6.2.8 Home page:

Home Page:

The Home Page is the main landing page, designed to introduce users to the platform's services and offerings. It features a welcoming design, showcasing the most popular channels, packages, and user benefits. The page also includes a navigation bar and quick links to key features like subscriptions and user accounts. It's visually appealing with dynamic content such as sliders, featured deals, and user testimonials. The primary goal is to capture user attention and guide them to further explore.

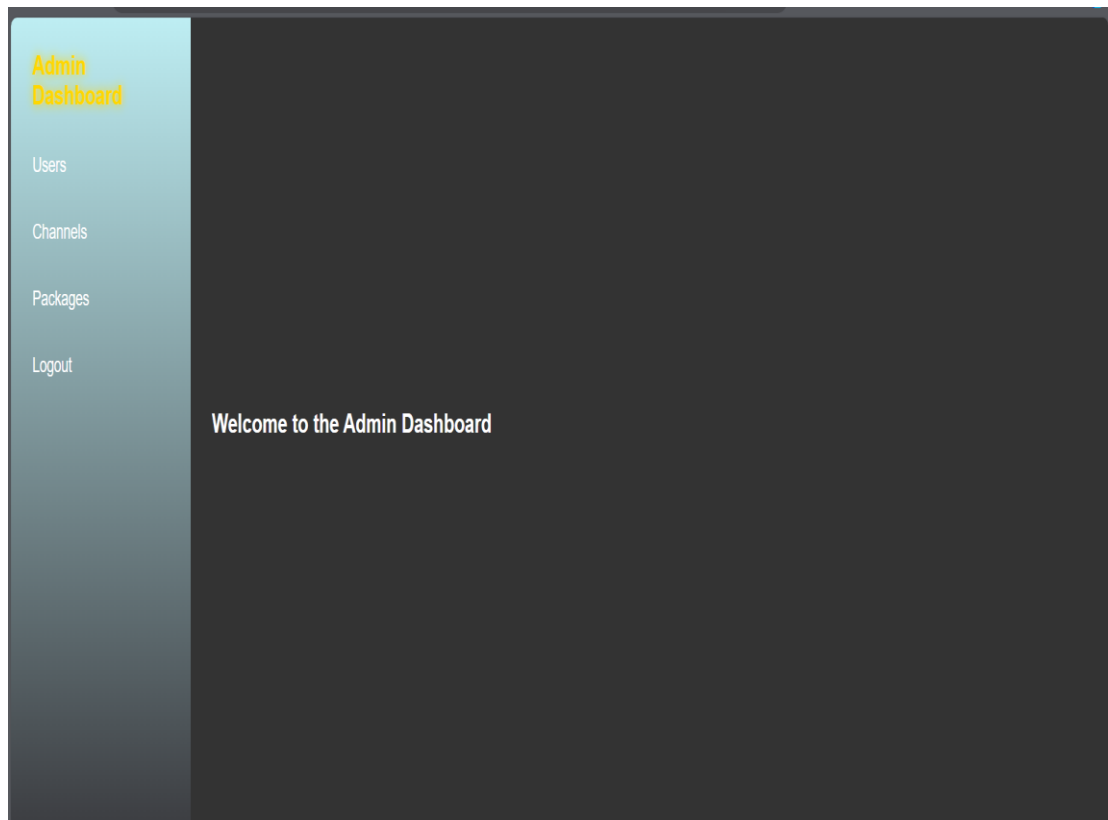

6.2.9 Login page:

Login Page:

The Login Page is where registered users can access their accounts by entering their credentials. It typically includes fields for username or email and password, with options to recover forgotten passwords. The layout is simple, focused on ensuring fast and easy login. User feedback (such as invalid credentials) is clearly displayed.

6.2.10 Admin Dashboard Page:

Admin Dashboard Page:

The Admin Dashboard Page provides an overview of key statistics and management tools for the platform. Admins can view user activity, subscription statistics, and system alerts in real-time. The dashboard includes quick links to manage users, channels, and packages

6.2.11 admin Users page:

Admin Dashboard	Manage Users		
Users	User ID	Username	Email
Channels	1	jewww	thedarklegend2005@gmail.com
Packages	2	ab	raj@gmail.com
Logout	5	razor44	abco@gmail.com

Admin Users Page:

This page allows admins to manage the user base, including editing, or removing users.

6.2.12 admin Channel page:

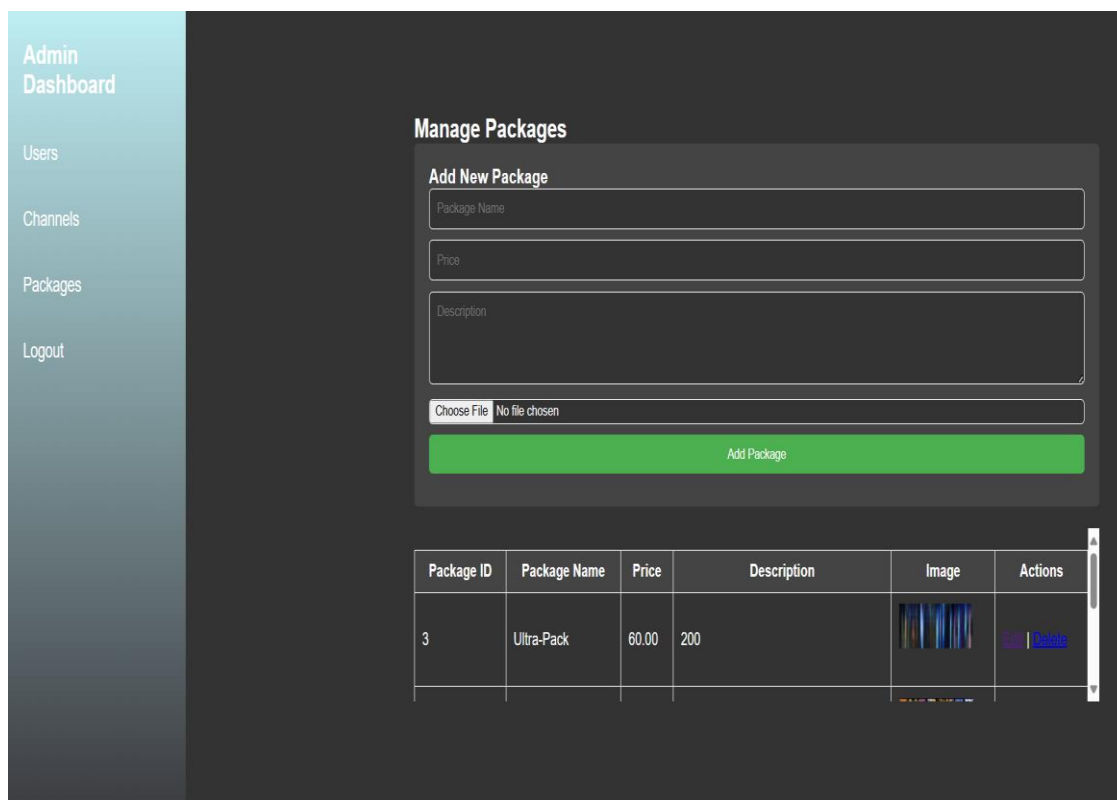

The screenshot displays the 'Admin Dashboard' interface. On the left is a sidebar with links: 'Users', 'Channels', 'Packages', and 'Logout'. The main content area is divided into two sections. The top section is a form for adding a new channel, with fields for 'Channel Name', 'Description', 'Price', and 'Channel Image (JPEG, JPG, PNG)'. Below the image field is a 'Choose File' button and the text 'No file chosen'. A yellow 'Add Channel' button is at the bottom of the form. The bottom section is a table listing existing channels.

Channel ID	Channel Name	Description	Price	Added Date	Image	Actions
5	Cartoon Network	Cartoon Kids Channel	12.00	2024-09-17 13:47:43		Edit Delete
		Cartoon Kids		2024-09-17		Edit

Admin Channels Page:

The Admin Channels Page enables administrators to manage the channels offered on the platform. They can add new channels, modify existing ones, or remove outdated channels. The page provides detailed forms for entering channel information such as name, description, pricing, and logos.

6.2.13 Admin Package page:

The screenshot displays the 'Admin Package' page. On the left is a sidebar with navigation links: Admin Dashboard, Users, Channels, Packages, and Logout. The main content area is titled 'Manage Packages' and contains an 'Add New Package' form. The form has input fields for 'Package Name', 'Price', and 'Description', followed by a file upload section with a 'Choose File' button and 'No file chosen' text, and a green 'Add Package' button. Below the form is a table listing existing packages.

Package ID	Package Name	Price	Description	Image	Actions
3	Ultra-Pack	60.00	200		Edit Delete

Admin Package Page:

The Admin Package Page is designed to create and manage subscription packages. Admins can bundle channels into various packages and assign pricing models. The page allows for editing package details, including package name, description, and associated channels

7. Future Enhancement & conclusion:

7.1 Future Enhancement:

- More Channels
- More Packages
- UI Enhancements
- Improved Admin Page

7.2 conclusions:

In conclusion, the Solaire Cable Services project has been a significant achievement, marked by creative problem-solving. The journey began with a clear vision of creating a modern, user-friendly platform to enhance cable service management. Throughout the development process, we encountered various challenges, such as integrating a dark-themed design while ensuring readability and maintaining functional design elements. Overcoming these hurdles involved meticulous adjustments and iterative testing to achieve a seamless user experience.

Despite facing hurdles such as intricate technical requirements and design inconsistencies, we turned these challenges into opportunities for refinement and excellence. The final product is a testament to our commitment to quality and user satisfaction, featuring a robust admin dashboard, intuitive user navigation, and cutting-edge functionality.

****Title: Comprehensive Report on Football Game Project****

**Introduction**

The football game project aims to deliver an immersive and interactive soccer experience by incorporating engaging gameplay mechanics, realistic physics, and user-friendly controls. The game is designed to offer multiple game modes, including penalty shootouts and free kick challenges, allowing players to test their skills in different football scenarios.

The project includes various features such as a dynamic pause menu, scene transitions, collision-based goal detection, and an intuitive UI for navigating between menus and

levels. The game leverages Unity's physics engine to provide realistic ball movement and impact reactions, ensuring an engaging experience for the players.

This document provides a comprehensive breakdown of the game, including its objectives, system design, gameplay mechanics, user interface, challenges faced, and future enhancements that can be incorporated.

Objectives of the Football Game Project

1. **Immersive Gameplay Mechanics:** The game aims to simulate real-world football mechanics, allowing players to experience precise ball control, aiming, and shooting techniques.
2. **Multiple Game Modes:** Players can participate in different game scenarios, including penalty shootouts, free kick challenges, and practice mode.
3. **Intuitive UI and Menu Navigation:** A well-designed UI provides easy navigation through different game scenes, including game menus, levels, and settings.
4. **Realistic Physics and AI Goalkeeping:** The game features accurate physics calculations for ball movement, goal-scoring conditions, and goalkeeper responses.
5. **Customizable Sound and Music:** Players can toggle background music and sound effects through the settings menu.
6. **Smooth Scene Transitions and Game State Management:** The system ensures seamless transitions between different levels and menus, allowing for an uninterrupted gaming experience.

**Description of the Current System

The football game is structured into multiple scenes, each designed to provide a unique experience. The main game menu acts as the hub where players can access different modes. The gameplay system incorporates a ball shooting mechanism, a target-based scoring system, and a goalkeeper AI that attempts to block shots.

The penalty shootout mode consists of a series of rounds where the player attempts to score goals from a fixed position. Free kick mode introduces obstacles like defensive walls, requiring players to aim their shots strategically. Additionally, a practice mode allows unrestricted movement within a stadium-like environment for refining ball control and shooting accuracy.

The game integrates a pause menu that provides options to resume, toggle music, or exit to the level selection menu. Unity's physics engine is used to handle ball movement and collisions effectively.

Key Features of the Game

1. Game Scenes and Navigation

- **Login and Registration Scenes:** Players can create accounts and log in to track their progress.
- **Main Menu:** Provides access to different game modes and settings.
- **Levels Menu:** Displays various game modes, including penalty shootouts and free kick challenges.
- **Gameplay Scenes:** These include penalty shootout rounds, free kick challenges, and a free practice mode.
- **Pause and Settings Menu:** Allows users to pause the game, adjust sound settings, or return to the levels menu.

2. Gameplay Mechanics

- **Ball Physics:** The game uses Unity's physics engine to ensure realistic ball movement, spin, and collision behavior.
- **Goal Detection:** The game detects when the ball crosses the goal line, updating the score accordingly.

- **Target-Based Free Kick Mode:** Players aim at designated targets to complete challenges.
- **Dynamic Wall Movement:** In some free kick levels, defensive walls move side-to-side, increasing difficulty.

3. Sound and Music

- **Background Music:** Players can toggle background music on and off from the settings menu.
- **Sound Effects:** Includes ball-kicking sounds, goal-scoring cheers, and goalkeeper reactions.

4. Pause and Exit Functionality

- Players can pause the game at any time.
- A menu overlay appears, allowing them to resume, return to the level menu, or exit the session.
- Exiting the session does not close the game but instead redirects the player to the level selection scene.

Game Mechanics and Technical Aspects

1. Ball Movement and Shooting Mechanism

The game features a power-based shooting system where players control the direction and force of their shots. The ball follows a realistic trajectory based on Unity's physics engine.

2. Goalkeeper AI

In penalty shootout mode, the goalkeeper uses an AI system to predict the ball's trajectory and attempt to block the shot. The AI difficulty can be adjusted to make the game more challenging.

3. Score Tracking System

Although initially designed to track player scores, the project has been updated to focus purely on gameplay without tracking scores across sessions. The scoring system updates during each match but does not store data persistently.

4. Target-Based Free Kick Mode

In free kick mode, players must hit a designated target inside the goal to complete the challenge. The target is set up with a collider to detect ball impact.

Challenges Encountered During Development

1. **Collision Detection Issues:** Initially, the ball would pass through colliders, requiring adjustments in mesh collider settings.
2. **UI Scaling Problems:** Ensuring consistent UI scaling across different screen resolutions was a challenge.
3. **Pause Menu Bugs:** The pause menu initially did not reactivate after being used once.
4. **Scene Transitions:** Managing smooth transitions between levels without game object conflicts required optimization.
5. **Goal Detection Accuracy:** Fine-tuning the goal collider to detect valid goals without registering false positives.

Future Enhancements

1. **Multiplayer Mode:** Introduce online and local multiplayer options to allow players to compete against each other.
2. **Career Mode:** A progression system where players start as beginners and work their way up to professional leagues.
3. **Enhanced Goalkeeper AI:** Improving goalkeeper reactions to better challenge the player's skills.
4. **Customizable Player Avatars:** Allow players to create and customize their in-game avatars.
5. **Weather Effects:** Adding dynamic weather conditions such as rain, wind, and snow that affect ball physics.
6. **Replay System:** Enabling players to watch their best goals in slow motion.
7. **Expanded Stadiums and Environments:** Increasing the variety of playing fields for a more immersive experience.

Conclusion

The **Football Game Project** successfully delivers an engaging and interactive soccer experience, incorporating well-structured gameplay mechanics, realistic physics, and user-friendly UI navigation. With game modes like **penalty shootouts** and **free kick challenges**, players can refine their football skills while enjoying an intuitive and immersive gaming experience.

The game's **robust physics system** ensures accurate ball movement, making shots feel responsive and realistic. The **goalkeeper AI**, although currently in its basic form, offers a foundation for future enhancements. **UI elements**, including the pause menu and level selection screen, allow seamless navigation and enhance overall usability.

Despite some initial challenges, such as **collision detection issues** and **UI scaling problems**, the project successfully overcame these obstacles through careful

debugging and optimization. The removal of the **score-tracking system** ensures a gameplay-focused experience, emphasizing skill development over persistent tracking.

Looking ahead, **future updates** may introduce **multiplayer functionality, career progression, and advanced AI mechanics**, further enriching the game. Other enhancements, such as **dynamic weather effects and replay options**, will provide added realism and engagement.

Overall, this football game project lays a **strong foundation** for expansion and improvement, ensuring **long-term engagement and replayability** for players.
